ENEOJO OMEDE

SOFTWARE ENGINEER

PROFILE

Energetic and reliable full-stack software developer with over three years experience in building full-stack applications with ruby on rails, react and redux, and also, Nodejs.Able to work in a fast-paced environment to deliver well tested, high quality, scalable and reusable software that adheres to Rails best practices and patterns.

WORK HISTORY

ANDELA - SOFTWARE ENGINEER

Lagos, Nigeria
Jan 2019 - Present

Andela builds distributed engineering teams with Africa's most talented software developers.
My responsibilities include:
- Collaborated on all stages of systems development lifecycle, from requirements gathering to production releases.
- Assessed costs and risks associated with developing new features and products.
- Built complex API-only backend features using Javascript, NodeJs, express, and PostgreSQL.
- Used Mocha and chai for unit, integration and acceptance testing in a test-driven environment.
- Designed client-side features using Javascript, React, Redux, Scss.
- Used Enzyme and selenium for end-to-end test on the client-side.
- Collaborated with developers to build full-stack features using Ruby, Ruby on Rails, JQuery and CoffeeScript, scss.
- Used Rspec, factory girl, capybara and selenium for unit testing, integration, acceptance and feature testing.
- Actively participated in code reviews and fixed bug issues.
- Tested websites and performed troubleshooting prior to deployment.

QUIP - FULLSTACK ENGINEER

New York, USA
Sept 2019 - Feb 2020

Quip looks to change oral care as we know it. At quip, we do not just design, produce and distribute electric toothbrushes, we ensure that our customers have the very best oral care experience.
My responsibilities include:
- Designed full-stack applications using Ruby on Rails, Jquery, PostgreSQL and SQL.
- Used Filters, scopes and delegate in the model to ensure clean code that adheres to rails conventions.
- Used the Rails Fat model pattern to ensure clean code and enforce the Single Responsibility Principle.
- Implemented test-driven simple and complex RESTful APIs using rails and some third party integration.
- Code refactored as required while working on the features and enhancements.
- Used RSpec, cucumber and capybara for unit, integration and end-to-end testing in a Test-Driven Development environment.
- Participated in code reviews and took care of bug fixes.
- Performed testing on software to uncover bugs and troubleshoot issues before deployment.
- The project was developed by Agile methodologies with daily standups, bi-weekly sprint planning and sprint reviews.
- Good working experience using Jira and Github.

FREELANCE DEVELOPER

PortHarcourt, Nigeria
Jun 2014 - Nov 2018

- Designed sites to be compatible with top browsers, including Firefox, Chrome and Safari.
- Designed, implemented and monitored web pages and sites for continuous improvement.
- Converted mockups into HTML, JavaScript, AJAX and JSON.
- Designed and implemented a full-stack e-commerce application for Omak concepts and investment using PHP, MySQL, Vanilla Javascript, JQuery and bootstrap. This automation helped reduce overall customer waiting time by 25% and increased daily sales by 12%.
- Built and styled 3 new mobile-friendly websites and transitioned old sites into mobile-friendly versions.
- Used programming capabilities in PHP, SQL and JavaScript and other libraries as needed.

EDUCATION

Ahmadu Bello University

Zaria, Kaduna State
2011 - 2016

Bachelor of Science: Computer Science

TECHNOLOGIES

- HTML, CSS, Javascript, Bootstrap, Materialize, SCSS.
- NodeJs, Express, React, Redux, Firebase.
- Ruby, Ruby on Rails.
- SQL, MySQL, Postgres, MongoDB
